

# **When We Can Sing**

*by Anna Tabbush*

When all of this is over  
I will drive the miles between us  
And I'll fill my silent world with your warm song  
When all of this is over  
We will sing sweet lines of freedom  
Let our voices find the place where they belong

When we can sing, when we can sing  
Our hearts will beat together  
When all of this is over  
We can sing, when we can sing  
We will fill our souls with music  
Let it resonate through every part of me  
When we can sing
